

German Hospital Sozialstiftung Bamberg has been ISO 50001:2018 certified since 2016 and is supported by the new software from WiriTec GmbH

The Bamberg Social Foundation (maximum care hospital) has successfully implemented the BAFA-eligible WiriTec C energy data management software to achieve even more sustainable energy efficiency and continue to meet the requirements of ISO 50001 certification.

Bensheim, Germany, September 25, 2024 – The Bamberg Social Foundation has successfully put the WiriTec C software solution from WiriTec GmbH into operation. By implementing this solution, the hospital is focusing on even more sustainable energy efficiency and continues to meet the requirements of ISO 50001:2018 certification.

Thanks to the intuitive operation and flexibility of the BAFA-eligible software, the old system was quickly replaced and the new one implemented within a few months. The Bamberg Social Foundation now benefits from further optimized energy management and transparent data for energy controlling, which is necessary to ensure certification and energy monitoring.

“The collaboration with WiriTec GmbH was excellent,” explains Daniel Eckert, Deputy Head of Energy Management at the Bamberg Social Foundation. “Thanks to the efficient project coordination and the user-friendly software solution, we were able to successfully put the system into operation in a very short time.”

About WiriTec

WiriTec GmbH is an innovative software company specializing in the digitalization of energy-related processes in buildings, data centers and industrial plants. Since 2009, it has been offering products, solutions and technologies as well as all services that enable customers to make their business processes in the energy sector smarter. As part of the speedikon group of companies, WiriTec GmbH benefits from cross-company expertise in the areas of facility management, data center management, photorealistic digital twins, artificial intelligence and robotics. WiriTec GmbH's employees have extensive experience in dealing with large amounts of data, complex databases and integration into existing software and hardware solutions. www.wiritec.com
